Figure 2 Information System For Tracking Poor Region Group Registrant and Accepted

Description :

Universitas Indonesia measures and tracks applications & admissions of underrepresented (and potentially underrepresented) groups including ethnic minorities, low income students, non-traditional students, women, LGBT students, disabled students etc with integration of database and Information system (web base database management system) in penerimaan.ui.ac.id. The Admissions Information System can measure and see applicants and prospective new students both with special needs (disabilities) and come from the 3T area. The information system for penerimaan.ui.ac.id/admin can only be accessed with a limited role for each stakeholder in the admissions program. When prospective new students register online, the information is stored in the information system and each closing period can be seen thoroughly by prospective students from regional origin, gender, underprivileged circumstances, and with disabilities.
