

THE Impact Rankings Questionnaire

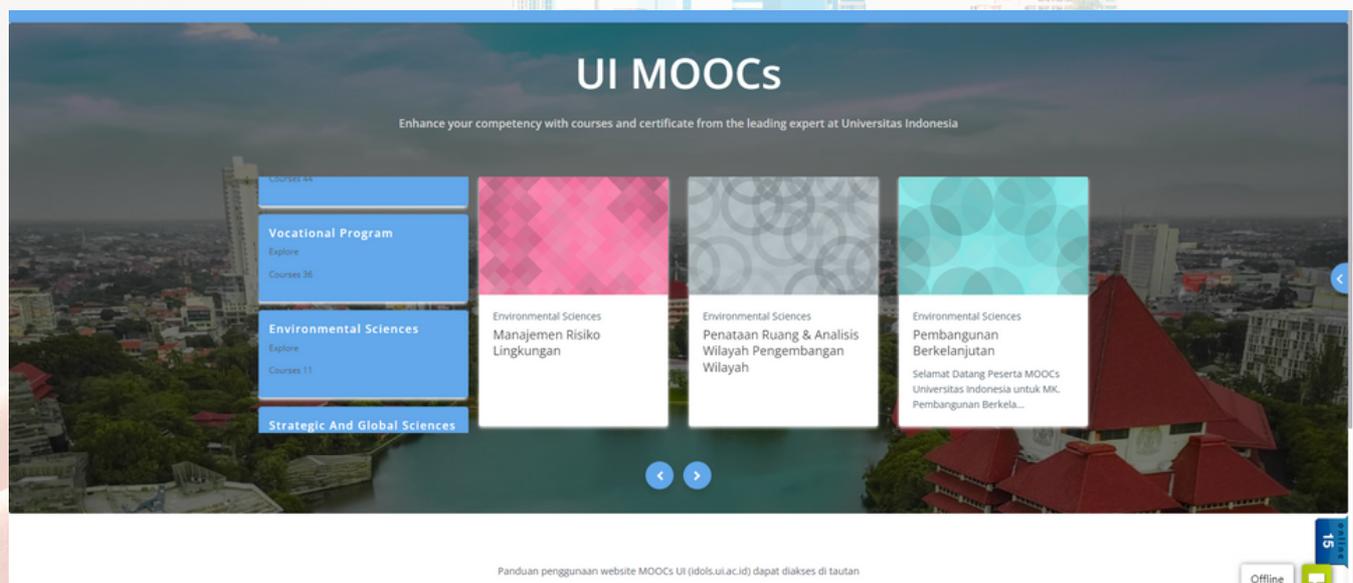

University : Universitas Indonesia
Faculty : Sekolah Ilmu Lingkungan
Web address : <https://sil.ui.ac.id/>

[4] SDG4 - Quality Education
[4.3] Lifelong learning measures
[4.3.1] Public resources (lifelong learning)

The school of environmental science is a study of reality and efforts to be made by humans to manage the environment according to their roles and functions. To support livelihoods and improve human welfare and other living things. Environmental Science is studied based on the principles of the three pillars of sustainable development: social, economic, and environmental.

Open Courses offered by SIL UI are in the form of Massive Online Open Courses (MOOCs). This program is part of the initiative of the University of Indonesia's School of Environmental science to respond to the needs of the Indonesian people for information and knowledge related to environmental.

Participants will get online lecture guides from lecturers, so they can explore reading materials and do exercises independently. At the end of the lecture, a quiz will be given to measure the extent to which participants understand the material.
