### Pencegahan Penularan untuk Pasien

- Untuk meminimalkan terjadinya penularan COVID-19 kepada terduga TBC dan pasien TBC, maka:
  - Melakukan rujukan spesimen untuk diagnosis TBC dengan pemeriksaan TCM bukan aerosol pasien
  - Plarujuk pasien ke RS dalam kondisi gawat darurat dengan sistem SPQDT
  - Hindari TB treatment
    - Interval pemberian OAT bisa diperpanjang melalui kendali pasien.
    - Informasikan keluarga Pasien dan keluarganya

### Karakteristik Inovasi ideal untuk tuberkulosis

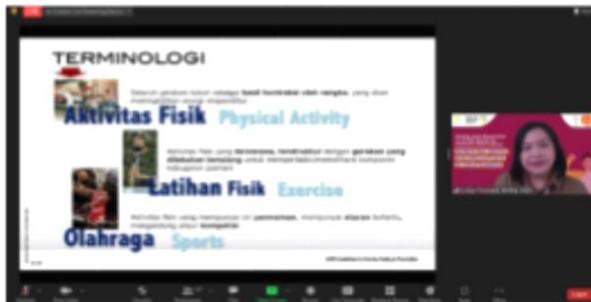

- Memiliki target spesifik pada tiap tahap perjalanan penyakit
  - Inovasi lebih sederhana sehingga lebih mudah diterapkan
  - Sesuai dengan target subjek sehingga mudah diterima
- Detail informasi pada setiap target
  - Tujuan informasi
- Menyesuaikan kebutuhan informasi pada setiap target
