[1] SDG1: NO POVERTY

[1.3] University anti-poverty programmes

[1.3.1] Bottom financial quintile admission target

Targets to admit students who fall into the bottom 20% of the household income group in the nation.

The Faculty of Medicine at Universitas Indonesia (FMUI) has introduced the Beasiswa Paripurna untuk Bangsa (BPuB) program. This initiative is designed to enhance educational access for academically promising students hailing from economically disadvantaged backgrounds. The primary goal of this scholarship program is to cultivate proficient healthcare professionals, specifically doctors characterized by competence, heightened social consciousness, and a commitment to advancing the reputation of the alma mater. The objective is to inspire these individuals to dedicate themselves to the equitable distribution of health services across Indonesia.

On an annual basis, FMUI sets a target of three (3) new students to benefit from tuition assistance through the BPuB program. Eligibility for participation in the scholarship selection process is extended to FMUI students who have not received any scholarships from other entities to pursue their education at FMUI.

[1.3.2] Bottom financial quintile student success

Graduation/completion targets for students who fall into the bottom 20% of household income group (or a more tightly defined target) in the country.

BPuB scholarship recipients are required to meet specific criteria throughout their academic tenure. This includes maintaining a minimum cumulative achievement

index score of 2.75, actively participating in at least one extracurricular activity, responsibly recording the use of scholarship funds, and regularly communicating with Academic Supervisors. Additionally, students must uphold good conduct, adhering to campus rules and refraining from any involvement in criminal activities. Failure to meet these obligations or securing additional scholarships from other sources may result in the suspension or postponement of the BPuB scholarship.

[1.3.3] Low-income student support

Provide support (e.g. food, housing, transportation, legal services) for students from low income families to enable them to complete university.

Faculty of Medicine, Universitas Indonesia (FMUI) is committed to providing comprehensive support to its clinical students, especially those engaged in night shifts at hospitals. To enhance their overall well-being and ensure a conducive environment, FMUI has implemented the provision of food assistance for students undertaking night duties at hospitals. Recognizing the demanding nature of these shifts, FMUI aims to alleviate the challenges faced by students, ensuring they have access to nutritious meals while fulfilling their responsibilities. FMUI also extends its support to students assigned to affiliated hospitals, such as RSUD Tangerang, RS Universitas Indonesia, RSAB Harapan Kita, and RSUP Persahabatan, by offering accommodation assistance.

In addition to these initiatives, FMUI goes above and beyond by offering subsidized living quarters in the form of dormitories for clinical students with lower socioeconomic backgrounds situated in Kalipasir, Cikini.

This strategic approach aims to address the specific needs of students facing financial constraints, ensuring they can pursue their medical education with minimal economic burden.

[1.3.4] Bottom financial quintile student support

Programmes or initiatives to assist students who fall into the bottom 20% of household income group (or a more tightly defined target) in the country to successfully complete their studies.

FMUI has established programs and initiatives to support students falling within the bottom 20% of the household income group, primarily through the provision of scholarships, particularly in the financial domain. In the year 2022, a total of 142 students benefited from scholarships, which were granted by various sources, including individuals, alumni, and corporate entities.
