

SDG 6.3. : Water usage and care

6.3.4. Water-conscious building standards

Description:

The Vocational Education Program has implemented the use of water-saving equipment as a building standard. By referring to the UI Rector's Decree Number 2893/SK/R/UI/2018 concerning the UI Green Campus Policy, and the UI Vocational Program Director's Decree Number 114/SK/DV/UI/2018 concerning support for green campus programs in the Vocational Education Program environment. The Universitas Indonesia Vocational Education Program continuously installs and replaces water equipment such as faucets and toilets to become water-efficient ones. The use of water-saving equipment is implemented as a standard for the construction and renovation of new buildings. The installed water saving equipment is as follows:

- Water taps with sensor tap systems and pressure taps in toilets in the VA, VB, VC, BC and Auditorium Buildings; and
- Toilets flush sitting toilets and flush urinals in toilets in the VA, VB, VC, BC and Auditorium Buildings.
