[6]SDG6 : CLEAN WATER AND SANITATION

[6.5] Water in the community

[6.5.1] Water management educational opportunities

In pursuit of fostering behavioral changes within communities, the Faculty of Medicine, Universitas Indonesia (FMUI), has initiated the *Sanitasi Total Berbasis Masyarakat* or STBM program. This initiative is anchored in five pillars, serving as guidelines for STBM activities to cultivate awareness and induce shifts in individual or communal hygiene and sanitation behaviors. These pillars encapsulate principles of self-awareness, touching emotions, thought patterns, and daily practices, focusing on :

1. Eliminating defecation in open space
2. Practicing hand hygiene with soap
3. Managing household drinking water and food
4. Ensuring secure disposal of household waste
5. Safeguarding household liquid waste

One of the programs is held on December 11st, 2022, in Cisewu, Sukajaya Village, Jonggol District, Bogor, West Java.

[6.5.2] Promoting conscious water usage

FMUI is promoting conscious water usage through a water conservation campaign by placing stickers in various locations on campus, such as sinks, faucets, ablution areas, and toilets.
