

Implementation of SDGs at the Faculty of Psychology

6. Clean Water and Sanitation

6.5. Water in the community

6.5.2. Promoting conscious water usage

Description:

The commitment of the faculty to environmentally responsible practices includes the conscious use and management of water resources, both within the campus and in the community. A comprehensive water conservation initiative has been implemented throughout the faculty to support this goal, which can be observed within the Faculty of Psychology. Every restroom facility within the faculty is equipped with strategically placed reminders to turn off the faucet after usage. These reminders, in the form of stickers affixed behind sink faucets, serve as a visual cue for individuals utilizing restroom facilities that do not feature automatic sensor-equipped faucets. This simple yet effective measure encourages everyone to be mindful of their water consumption.
