<p>Pedestrian Path</p>	<p>Car Parking Regulation</p>

Description:

To promote more sustainable travel, there are initiatives to limit the number of private motor vehicles entering the Faculty area, by providing:

1. Shuttle from the University of Indonesia.
2. Electric bikes are available for rental as part of the university program.
3. Bus stops as a facility to provide comfort while waiting for buses. It also provides shelter from rain after disembarking from the bus.
4. Bicycle facilities can be utilized by the entire community by following university regulations.
5. Pedestrian paths are intended for pedestrians and equipped with facilities for the visually impaired. The condition of F.Psi UI pedestrian paths prioritizes comfort, considering humane aspects such as circulation, natural and climatic factors, security, cleanliness, and beauty.
6. The Faculty of Psychology is making efforts to create a greener faculty, and one of these efforts is issuing a regulation regarding the restriction of car parking areas within the Faculty. This regulation is distributed to all units, and we also socialize it through the digital and conventional media channels that we have.
