

Sustainable Development Goals (SDGs) 17: Partnerships for the Goals

Metric Reference 17.4.1

(Education for SDGs commitment to meaningful education

Have a commitment to meaningful education around the SDGs across the university, relevant and applicable to all students)

Description

The curriculum is designed to provide students with the knowledge, abilities, and values necessary to essential to the future of Sustainable Development Goals (SDGs). While fostering critical thinking, problem-solving skills, and moral decision-making, it builds a thorough awareness of sustainability, social responsibility, and environmental stewardship. Students who successfully complete the curriculum will be well-equipped to:

- Social skills such as empathy and behavioral abilities communicative to network, interact and collaborate in scientific concern.
- Have sensitivity and concern for surrounding environmental problems.
- Able to provide alternative problem solutions to various problems that arise in the community, nation, and state.

FMIPA UI may contribute to the advancement of sustainability by providing a thorough curriculum that is in line with the SDGs and places an emphasis on experiential learning and global views.
