

**Faculty:** Faculty of Mathematics and Natural Sciences

**University:** University of Indonesia

## [16] Peace, Justice, and Strong Institutions

### [16.2] University governance measures

#### [16.2.1] Elected representation

The Faculty of Mathematics and Natural Sciences (FMIPA) at Universitas Indonesia has a system that involves undergraduate students as representatives in the university's highest governing body. This allows them to voice their aspirations and opinions on important policies that impact campus life. One example of this representation is through BEM FMIPA UI, where undergraduate students actively participate in advocating for student interests and are involved in decision-making processes at both the faculty and university levels.

#### [16.2.2] Students union

At the Faculty of Mathematics and Natural Sciences (FMIPA) at Universitas Indonesia, the **Student Representative Body (BPM)** serves the legislative function by overseeing and formulating policies within student organizations. The **Student Executive Body (BEM)** fulfills the executive function, responsible for organizing and implementing various student programs. Additionally, there is the **Department Student Association (HMD)**, which acts as a platform for students in each department to manage activities specific to their academic fields.

BPM, BEM, and HMD collaborate to support a variety of student activities, both academic and non-academic, while also voicing the aspirations of students in each department. Moreover, these organizations play a crucial role in providing input on university governance and offering necessary support for students to carry out their activities. They also organize various social activities aimed at strengthening bonds among students and benefiting society. Thus, these bodies contribute significantly to campus life at FMIPA and have a positive impact on the community.

### **[16.2.3] Identify and engage with local stakeholders**

### **[16.2.4] Participatory bodies for stakeholder engagement**

### **[16.2.5] University principles on corruption and bribery**

The Faculty of Mathematics and Natural Sciences (FMIPA) at Universitas Indonesia supports and adheres to the **Rector's Decree Number 14** regarding the Code of Ethics and Conduct. This decree encompasses the principles and commitments of the university in addressing issues related to organized crime, corruption, and bribery. FMIPA is dedicated to implementing the ethical values and regulations outlined in this decree across all academic and non-academic activities, ensuring that all members of the academic community actively contribute to creating a clean, transparent environment free from harmful practices.

FMIPA is also committed to upholding the university's principles regarding corruption and bribery by educating students and staff about the dangers of such practices and providing safe channels for reporting suspected violations. In this way, FMIPA strives to foster a culture of integrity and accountability in all aspects of campus life.

### **[16.2.6] Academic freedom policy**

In accordance with the policies of Universitas Indonesia, the Faculty of Mathematics and Natural Sciences (FMIPA) supports academic freedom. This policy is based on the vision and mission of Universitas Indonesia, in accordance with Government Regulation Number 68 of 2013 regarding the Statute of Universitas Indonesia (UI) and its nine fundamental values. Academic freedom encompasses the freedom to choose research areas as well as to speak and teach openly, which is at the core of academic life. FMIPA ensures that academic freedom is applied in all aspects of teaching and research for both junior and senior academics, including those with tenure, thus creating an inclusive and dynamic academic environment.
